### Book Descriptions:

We have made it easy for you to find a PDF Ebooks without any digging. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with breeze 2 monitor manual . To get started finding breeze 2 monitor manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

## Book Descriptions:

# breeze 2 monitor manual

Pull a and push b handle to expose test strip. Apply sample. Bayer Customer Service 8003488100. Bayer Customer Service 8003488100. This ease of use comes with the added bonus of the reliability that you count on from Bayer. This user guide shows you how to use your Breeze system. It will answer any questions you might have and guide you through the testing process. Release Button Top End of Meter Test Strip Slot Bayer Customer Service 8003488100. Bayer Customer Service 8003488100. Open Meter 1. Turn the meter over so the display screen is facing down. Open the meter by pressing in on the back edge of the open latch and then pulling up on the base. Helpful Hint The meter must be kept flat when closing. If the meter is not kept flat, the disc may move and become damaged and you may waste test strips. Bayer Customer Service 8003488100. The number is shown with your test result. To see the count when the meter is off, press the button. Insert the lancet firmly into the lancing device until it comes to a full stop. This will cock the device. You can also pull and release the cocking handle. Bayer Customer Service 8003488100. Be sure to save it for disposing of the used lancet. 4. Replace the gray endcap prior to getting your blood drop. Push Out Test Strip 5. Your B meter uses Breeze a special, easy-to-use "Pull and Push" design. Here's how it works Hold the meter comfortably in one hand. Shallow Deep Puncture Puncture 6. Press the endcap firmly against the puncture site and press the blue release button with your thumb. Bayer Customer Service 8003488100. Do not squeeze around the puncture site. 8. Test immediately after a good blood drop has formed. Test 9. Your test strip is like a straw—it sips in a sample of blood. Helpful Hint The number displayed in the upper left corner is the number of test strips remaining in your 10-test disc. IMPORTANT If you want to mark this result as a deleted blood test, you must do that now, while the result is still being displayed. <http://fine-trading-knotwork.com/uploads/echowell-manual-download.xml>

### • 1.0.

With the used lancet still in the lancing device, push the lancet needle completely into the middle of the exposed side of the cap. To do this, follow these steps 1. Open the button door see page 3. 2. Press the button to mark as deleted. 3. The symbol indicates a deleted result. 4. Press to accept. 5. Press to turn your meter off. Bayer Customer Service 8003488100. Consult your physician or healthcare professional for the target glucose values appropriate for you. Attach the clear AST endcap to the M 2 lancing device. Bayer Customer Service 8003488100. Avoid veins, moles, bones, and tendons. For palm testing, it is not necessary to rub the skin or pump the sary to rub the skin or pump the sary to rub the skin or pump the device. Do not apply control solution to the test strip directly from the bottle. NOTE The control solution contains a red dye and may stain. Bayer Customer Service 8003488100. The control solution is automatically pulled into the test strip. IMPORTANT Hold the test strip in place until the meter beeps, then move the meter away. 4. After the beep, the display counts down from "5" to "1.". Press the button to mark as a control. Press to accept. Bayer Customer Service 8003488100. Press the release button. Be sure the heel of your hand is not against the meter handle. NOTE If you block the meter handle with your hand, the test strip may not release properly. When the memory is full, the meter will save the newest result and discard the oldest. Bayer Customer Service 8003488100. You can view averages for 1 day the previous 24 hours, 7 days, 14 days, and 30 days. To see the averages, simply follow these steps. 1. Open the button door and press the button. The meter will show you your last result. If you change your mind and do not want to clear results, simply let go of the buttons before all three dashes have been lit. Bayer Customer Service

Just remember to press the button first to store your changes. Setting the Time 1. Open the button door see page 3. 2. Press 3. Press as needed to. Press to accept and move on. Bayer Customer Service 8003488100. Press to accept and move on. 6. Press to change the year. Press to accept and move on. Bayer Customer Service 8003488100. Press to accept. Bayer Customer Service 8003488100. Bayer is not responsible for any erroneous results from the use of other software. This document has complete information on the topic of user protection and can be used as background material for instruction. Bayer Customer Service 8003488100. A battery will already be installed in the meter when you buy it. A flashing battery on the screen means that it is time to put a new battery in the meter. You will not erase test results in the meter's memory when you change the battery. Make sure the battery holder is pushed all the way in. 6. Close the meter. 7. Page 50 Replacement Items Please be sure to register your meter, either by returning Page 53 Bayer HealthCare LLC Bayer, the Bayer Cross, Ascensia, Breeze, Autodisc, Microlet and Vaculance are. Faster Test Results, and Smaller Blood Drop, Increased Memory Capacity as easy as 123. 1 Open meter, insert 10test disc, close meter. 1 2 Pull a and push b handle to expose test strip. We are proud to be your partner in helping you manage your diabetes. We understand that people who regularly check their blood glucose levels want a meter that is simple, straightforward and easy to use. Page 6 A Look at Your Breeze Meter Release Button Press to release and discard the used test strip.

Screen This is where your test results will be displayed. Data Port side of meter Insert cable here to allow communication between the meter and a personal computer. Battery Holder side of meter Holds one CR2032 lithium battery included. Memory Button Used to view your blood glucose results stored in memory and to view your test result averages. Setup Button Used to enter the Setup mode

and easily change the time, date or other features. Accept Button Used to accept changes made in the Setup mode. Page 8 Explanation of Display Symbols A full display, as shown here, indicates that all elements in the display are working properly. Compare your meter to the display shown here before you run each test. Open Meter 1. Turn the meter over so the display screen is facing down. Open the meter by pressing in on the back edge of the open latch and then pulling up on the base. Open Test Disc Package 2. Open a new 10test disc package. Check the expiration date on the disc. [www.BayerDiabetes.com](http://www.BayerDiabetes.com). Page 12 Insert Disc 3. Insert a new 10test disc with the bumpy side up, aligning the 5 notches in the disc with the tabs on the meter. Close Meter 4. Close the meter and snap it shut. Keep the meter flat when closing it. Helpful Hint The meter must be kept flat when closing. If the meter is not kept flat, the disc may move and become damaged and you may waste test strips. Page 13 Counting the Number of Strips Left Your Breeze Meter will automatically count down the number of test strips you have left. The number is shown with your test result. To see the count when the meter is off, press the button. NOTE This count is reset to 10 every time you open the meter. To keep an accurate count, open the meter only when all 10 of the test strips have been used in the 10test disc. Your meter will also tell you when you need to insert a new 10test disc. Page 14 Running a blood glucose Test 1. Wash your hands well with soap and warm water. Rinse and dry thoroughly.

NOTE For testing sites other than ngertips, see page 19. Prepare Lancing Device 2. Remove the endcap from the MICrOLeT Adjustable Lancing Device. See MICrOLeT Device package insert for complete instructions. 3. Loosen the cap on a lancet by rotating it. Page 15 Then insert the lancet firmly until it comes to a full stop. This will “cock” the device. 4. Twist off the lancet cap and replace the endcap. Push Out Test Strip 5. Your Breeze Meter uses a special, easyto use “Pull and Push” design. Here’s how it works Hold the meter comfortably in one hand. Firmly grasp the meter handle with the other hand shown here. Now, just “Pull and Push”—“Pull” the handle out until it stops and “Push” it back in until it stops again. Page 16 NOTE After the meter handle is pushed in, the release button is UP, a test strip is pushed out, and a series of “apply blood” prompts appears. The meter is now ready to run a blood glucose test. Never reinsert a test strip into the meter. 6. Stick your finger and form a small round drop of blood. Page 17 Test 7. Your test strip is like a straw—it sips in a sample of blood. Move the entire front edge of the test strip until it touches the edge of the blood drop. The blood is automatically pulled into the test strip and fills the test strip. Hold the test strip in place until the meter beeps, then move the meter away. Helpful Hint The number displayed in the upper left corner is the number of test strips remaining in your 10test disc. IMPORTANT If you want to mark this result as a deleted blood test, you must do that now, while the result is still being displayed. See “Marking a Deleted Blood Test” on page 17. Page 19 9. To release the used test strip, hold the meter with the test strip pointing down over a waste container. Press the release button. NOTE If you block the meter handle with your hand, the test strip may not release properly. 10. Press the button to turn the meter off.

NOTE If you forget to turn your meter off, it will turn off automatically after three minutes. If this is the case Consult your physician or healthcare professional immediately. Page 21 Marking a Deleted Blood Test NOTE Marking a test result as a deleted blood test excludes it from all of the averages that are calculated by your meter. You must mark the result immediately after the test is performed — while the result is still displayed on the screen. To do this, follow these steps 1. Open the Button Door see page 3. 2. Press the button to mark as deleted. 3. The symbol indicates a deleted result. 4. Press to accept. 5. Press to turn your meter off. [www.BayerDiabetes.com](http://www.BayerDiabetes.com). Page 22 Understanding Your Test Results Expected Blood Glucose Values Blood glucose values will vary from time to time depending on food intake, medication dosages, health, stress or exercise. Consult your physician or healthcare professional for the target glucose values appropriate for you. Page 23 Unusual Test Results If your blood glucose result doesn’t match the way you feel, follow these steps 1. run a control test see page 20; 2. retest your blood glucose see page 10; 3. call your doctor immediately if

your result still does not agree with the way you feel. Alternative Site Testing Blood samples for glucose testing may be taken from sites other than your fingertips. Page 24 running a Control Test There are times when you will want to do a quality control test so you know that your system is working properly. You may also want to do a control test to check the way you do your test. Simply follow these steps Push Out Test Strip 1. Hold the meter comfortably in one hand. Page 25 Test 3. Move the entire front edge of the test strip until it touches the edge of the drop of the control solution. The control solution is automatically pulled into the test strip. IMPORTANT Hold the test strip in place until the meter beeps, then move the meter away. 4.

After the beep, the display counts down from "5" to "1." Your Control test result then appears on the screen. www.BayerDiabetes. Page 26 Compare this Control test result with the control range printed on the bottom flap of the carton of Breeze Test Strips. Marking a Control Test Marking a test result as a control test excludes it from being included in your test averages. Page 27 6. To release the used test strip, hold the meter with the test strip pointing down over a waste container. NOTE If you block the meter handle with your hand, the test strip may not release properly. 7. Press to turn your meter off. www.BayerDiabetes. Page 28 beyond everyday use recalling Test results Your Breeze Meter can store up to 420 test results in its memory. This makes it easy to see your previous blood glucose test results. To view those results 1. Open the Button Door. 2. Press the button. The meter shows you the most recent test result. 3. Press the button to see each of your stored results. Helpful Hint When only is shown on the display, you are seeing the most recent result; when only is shown, you are seeing the oldest result. Page 29 Viewing Your Averages Your Breeze Meter calculates several different averages of your blood glucose results. You can view averages for 1 day the previous 24 hours, 7 days, 14 days, and 30 days. To see the averages, simply follow these steps. 1. Open the Button Door and press the meter will show you your last result. button. The 2. Press the button again to see your blood glucose average for the last 14 days. 3. Page 30 Clearing Stored Test Results To clear the stored results from your meter, follow these simple steps 1. Open the Button Door. 2. Press the button. 3. Press the button again and hold it. 4. While holding the press and hold the button, button. 5. Hold both buttons together until all three dashes are continuously lit for about 3 seconds.

If you change your mind and do not want to clear results, simply let go of the buttons before all three dashes have been lit. Page 31 setUp function Helpful Hint You can press the button at any time during Setup to turn the meter off. Just remember to press the button first to store your changes. Setting the Time 1. Open the Button Door see page 3. 2. Press. 3. Press or as needed to change the hour. When the correct hour is being displayed, press to accept it and move on. 4. Press or to change the minutes. Press to accept and move on. Page 32 5. Press or or PM. to select AM Press to accept and move on. Setting the Date NOTE If you have just set the time, skip ahead to step 4. 1. Press or the month. to change Press to accept and move on. 6. Press or the year. to change Press to accept and move on.

www.BayerDiabetes. Page 34 Setting the Buzzer Level Your Breeze Meter has an easyto use volume control for the buzzer. There are three different buzzer levels high low off NOTE If you have just set the date, skip ahead to step 4. 1. Open the Button Door. 2. Press. 3. Press until you see the "buzzer" symbol. 4. Press or to change the buzzer level. Press to accept and move on. Page 35 Setting the Time Format 12 or 24hour Clock Your meter can display the time format as either 12hour or 24hour .You can change the time format as follows NOTE If you have just set the buzzer level, skip ahead to step 4. 1. Open the Button Door. 2. Press. 3. Press until you see the "time format" display. 4. Press or to change the time format. Press to accept and move on. www.BayerDiabetes. Page 36 Setting the Date Format Your meter can display the date format as either "monthday" or as "daymonth" .You can change the date format as follows NOTE If you have just set the time format, skip ahead to step 4. 1. Open the Button Door. 2. Press. 3.

Press until you see the “date format” display. 4. Press or to change the date format. Press to accept.

**Page 37 Transferring results To a Computer** You can transfer test results from the Breeze Meter to a computer, where they can be summarized in a report with graphs and tables. To make use of this feature, you need Bayer diabetes management software and a Bayer data cable. **CAUTION** The BREEZE Meter has not been tested or certified by Bayer for use with any software other than Bayer diabetes management software. Bayer is not responsible for any erroneous results from the use of other software.

**Page 38 Cleaning your meter** Your Breeze Meter can be cleaned using a moist not wet lintfree tissue with a mild detergent or disinfecting solution 1 part bleach mixed with 9 parts water. Do not use alcohol. Wipe the outside of the meter, taking care to keep detergent or disinfecting solution from running down into the test strip slot. Wipe dry with a lintfree tissue after cleaning. If you do get moisture in the test strip slot, wick it away with a corner of a tissue as shown.

**Page 39 replacing The battery** Your Breeze Meter uses one 3volt lithium battery CR2032. A battery will already be installed in the meter when you buy it. A flashing battery on the screen means that it is time to put a new battery in the meter. You will not erase test results in the meter’s memory when you change the battery. You may need to reset the time. **CAUTION** If you have a low battery in your meter, you should replace the battery within approximately 20 readings or one week.

**Page 40 To replace the battery, follow these steps** **NOTE** A replacement battery CR2032 can be found at most stores or can be ordered from Bayer Customer Service free of charge for meter owners in the U.S.A..

1. Hold the meter with the display screen down. Open the meter by pressing in on the open latch and pulling up.
2. Slide out the battery holder. **NOTE** You must open the meter first in order to remove the battery holder.

Make sure the battery holder is pushed all the way in. 6. Close the meter. 7. Check the meter’s time and reset if needed see page 27. Repeat the test and make sure the test strip is completely filled. If LO appears again, contact your physician or healthcare professional. Wash your hands and the test site. Repeat the test.

**Page 45 What You See What It Means What You Should Do Low Battery** symbol flashes if battery power is low. Replace the battery CR2032 within 20 readings or one week. Battery life has ended. Replace the battery CR2032. Temperature is outside the operating range of the meter too hot or too cold. Allow the meter to reach room temperature. Meter does not recognize the test disc. Remove the test disc and inspect the meter for foreign material. Rotate the disc and reinstall it.

**Page 46 What You See 42 What It Means What You Should Do** 1. You may have applied blood too early to the test strip. 1. Repeat the test and wait until you see the “apply blood” prompts before you touch the strip to the blood drop. 2. There may be moisture in the test strip slot. 2. Wick the moisture away see page 34, then repeat the test. There was a problem completely filling the test strip; accurate test result is not possible.

**Page 47 What You See What It Means What You Should Do** Meter has detected an error; accurate result is not possible. Turn the meter off, then on using, then retest. If the error remains, contact Bayer Customer Service. The display goes blank when the meter is turned on. 1. You may have accidentally pressed button. the 1. Press the 2. Meter has turned off after 3 minutes without use or after 10 minutes of no use while waiting for you to apply blood or control solution. 2. **Page 48 What You See Control Test** result is out of range too high or too low. **What You Should Do** Run another control test. If the result is still out of range, retest with a new 10test disc and control solution with an acceptable expiration date and open use life date.

If still out of range, contact Bayer Customer Service.

**Page 49 Customer Service** If a problem arises, work through the Solving Problems section see page 39. You will probably find your solution there. If you are still having trouble, please call our Customer Service Department.

**Page 51 Warranty Information** Please be sure to register your meter, either by returning the completed warranty card, registering online at [www.BayerDiabetes.com](http://www.BayerDiabetes.com) or calling Customer Service at 18003488100.

**Manufacturer’s Warranty** Bayer HealthCare LLC “Bayer” warrants to the original purchaser that this instrument will be free from defects in materials and workmanship for 5 years from the date of original purchase except as noted below.

**Page 52 4.** Bayer has no knowledge of the performance of

the BREEZE Meter when used with any Test Strip Discs other than BREEZE or AUTODISC Test Strip Discs, and therefore makes no warranty of the performance of the BREEZE Meter when used with any Test Strips or Test Strip Discs other than BREEZE or AUTODISC Test Strips or when the BREEZE or AUTODISC Test Strip is altered or modified in any manner.
