crisp laser printing, flatbed and PC faxing, copying, and scanning. Most important, its made to work
at the speed of business. Features Laser printers. Get crisp, clear resolution for all your documents.
With the MFC7820N, high quality and fast printing go hand in hand. It prints ultrasharp, clear
monochrome laser documents up to 2400 x 600 dpi HQ1200 at an amazing up to 20 pages per minute
print speeds will vary with use. Quality printing and versatility allow you to create professional
output for your business. Plain paper fax. A fast, efficient, versatile fax with room to grow. Sending or
receiving standard or legal size documents is easy with their flatbed design. With standard memory
of 32MB, incoming faxes will be saved even if you run out of paper. And, with this MFC, theres never
any waiting around.

With the Dual Access feature, you can send your fax into memory even while another is being
received. Digital copier. Enjoy a fast, full function copier with versatility. Crisp laser quality copies, at
up to 20 per minute actual PPM will vary, that may also be used as standalone copiers without even
being attached to your PC. In addition, you can multicopy up to 99 copies, and reduce and enlarge
from 25% to 400%. Color scanner. Scan one or many documents at the touch of a button. Adding
images to your work has never been quicker or easier, by scanning photos, images, and documents
at resolutions up to 9,600 x 9,600 dpi. ScanSoft PaperPort and OmniPage OCR software are included
for Windows and Presto! PageManager for Mac. Scanning features include Scan to File, Scan to

Email, or Scan to OCR. PC fax. You don't have to use paper or even leave your desk. With the MFC7820N, you have the option of sending faxes from your PC application or receiving faxes into your PC, allowing you to preview a fax before it is printed. Built-in internal network. The Ethernet interface makes the MFC7820N ready for your connected workgroup. PCL6 and BRS3 PostScript Level 3 emulations make the MFC7820N ready for your big professional jobs. What's in the Box Brother MFC7820N, starter toner cartridge 1,500-page yield, DR350 drum 12,000-page yield, power cable, user guide and setup information, software CD-ROM, warranty information; printer cable not included. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Rene E. Borroto 5.0 out of 5 stars They're inexpensive, include much needed standard features, and last. It was easy to set up based on my experience with Brother network printers.

You should know that it's best if you DO NOT set it up to use the DHCP server to assign it an IP address. It's best if you assign it an address manually so that it remains fixed, in case you lose power or have to shut it off to reset it neither of which has happened to me yet, but did with my previous ink jet Brother. I set it up to be used with my Macintosh AND with my wife's laptop PC, and it has worked flawlessly. The Mac sees it on the network and you can add it easily. The PC uses the driver software that goes through all the install steps, pretty much by itself, with little input from the user. I manually set up its IP address on the printer controls to 192.168.2.119 but that depends on your particular network. Just make sure you don't have a duplicate address on your network. You can also connect it via USB directly to your computer. I would highly recommend this printer if you don't need color printing it scans in color though. My personal experience is that color is rarely needed unless you plan on printing color reports or photos. This Brother prints quickly and beautifully. It was a breeze to set up on my PC. Setting it up on the Mac was ALMOST as easy, but not quite. I also have a previously installed Epson Scanner, and the Brother Control Center kept trying to use unsuccessfully, of course the Epson scan software. Curses! But it had an easy fix. I uninstalled all of the Epson software, restarted my Mac, and the Brother worked flawlessly. I then reinstalled the Epson software, restarted again, and both the Epson scanner and the Brother work well. Works perfectly with both the Mac and PC. This feature would be great in an office setting where the Brother wouldn't necessarily be right next to the computer. Unlike the experience of a previous user, I had no trouble with the OCR software for the Mac Presto Page Manager. It worked fine with a good quality original.

I'm intending to put a new circuit into the room so the printer is isolated from the rest of the equipment. Of course, NEVER plug a laser printer directly into a UPS. Other than the high power requirement, the machine is just perfect! The printer has a webpage where you can see how many pages have been printed, scanned, faxed etc. The speed is good a 20ppm laser is way way faster than a 20 ppm inkjet since the inkjet only gives the 20ppm speed at its lowest almost unusable settings while the laser gives it at its normal settings. Another advantage over the inkjet is, it can print a large document 100 page or maybe more without getting stuck or running out of paper my previous brother inkjet MFC always ran into paper jam or something if printed 40 or more pages at once. I have not had any problems with it in the last few months I have had it. Faxing and scanning work over the network as well, aside from printing. And that's not just on the home network with a little configuration of ports on your home router, you can even access the printer from outside your home. You may say that's not very useful since you need to be home to pick up the printout but it is a good feature to have for some occasional usefulness. I once printed a document when connected to the Internet at an airport, just to have it ready for reading when I got back home. It automatically enters a low power mode if not used for 5 minutes can increase the timeout to more than 5 minutes on its management webpage if needed. The low power mode is absolutely quiet since there's no fan running. It seems the unit has an FTP server but that is not documented and I could not figure out

how to really use it I put a file in its FTP folder, the unit automatically deleted the file. And maybe I should have expected this, it printed the file before deleting it. In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading.
