To take images that are in focus, be sure to first press the shutter button lightly halfway to focus, then take the shot.The camera can also detect and focus on faces, setting the color and brightness to optimal levels. The flash will rise and lower automatically depending on the shooting scene and camera settings.Pressing the l button while turning on the camera power will turn off all sounds except for warning sounds. Especially when there is an orange or blue colored background a wall for example, not be possible to shoot with the appropriate color. If this happens, try shooting in G mode p. Please note that erased images cannot be recovered. Exercise adequate caution before erasing an image. Enter Playback mode. Choose an image to erase. When watching a movie on a computer, frames may drop, it may not play smoothly, and the audio may stop suddenly depending on the computer's capabilities. If you use the supplied software to copy the movie back onto the memory card, you can play back the movie smoothly with the camera. System Requirements Windows Windows Vista including Service Pack 1 and 2 Windows XP Service Pack 2, Service Pack 3. Transferring Images to a Computer Install the software.This product is designed to achieve excellent performance when used with genuine Canon accessories.Some accessories are not sold in some regions, or may no longer be available. Recommended for powering the camera for an extended period of time or when connecting to a computer or printer. However, the brightness of the image on the screen, and the brightness of the actual image recorded may be different. The menu items are organized under tabs, such as for shooting 4 and playback 1.Muting Sounds Adjusting the Volume Display the menu.Are there functions that cannot be reset.As you cannot retrieve the erased data, exercise adequate caution before low level formatting the memory card.

Power Saving during Shooting The monitor will turn off approximately 1 minute after the camera is

last operated. When the camera power is off, press and hold the m button, then press the power button to display the clock. All you need do is press the shutter button to take an optimized picture. Set the mode dial to K. Choose a Shooting mode. Depending on the scene, the ISO speed will be set higher and the shutter speed faster than in A mode so that you can shoot in dark places with reduced camera shake and subject blur. What if the indicator blinks orange and a flashing appears. When you press the shutter button halfway in low light conditions where camera shake is likely, the indicator will blink orange and a flashing screen. Digital TeleConverter The focal length of the lens can be increased by an equivalent of 1.4x or 2.3x. This feature is useful when you want to shoot at a particular focal length. Once inserted, however, they cannot be deleted. What if a face is not detected. Even if your face is not detected after joining the subjects, the shutter will release approximately 30 seconds later. AE stands for Auto Exposure. What if the shutter speed and aperture value are displayed in orange. If a correct exposure cannot be obtained when pressing the shutter button halfway, the shutter speed and aperture value are shown in orange. If you choose Converter p. 63. Changing the Compression Ratio Image Quality You can choose from the following two levels of compression ratio image quality Fine, Choose the recording pixels. You can use the supplied software to broadly adjust the image with minimal loss in image quality. Differences between RAW images and JPEG images. Digital Zoom p. 62, Digital TeleConverter p. 63, and Date Stamp p. 65 are not available when shooting in Shooting Closeups Macro You can shoot an object at a close distance or even shoot extreme close ups of it. Auto Automatically sets the optimal white balance for the shooting conditions.

Day Light Fine weather conditions, outdoor shooting Cloudy Cloudy, shady, twilight conditions Tungsten Tungsten, bulbtype 3wavelength fluorescent lighting Warmwhite fluorescent, coolwhite fluorescent, warmwhitetype. My Colors Off Vivid Neutral Sepia Positive Film Lighter Skin Tone Darker Skin Tone Vivid Blue Vivid Green Vivid Red Custom Color. You can now recompose and shoot. What if the display does not magnify. After locking the focus, the focal distance will not change even when you release your finger from the shutter button. Frame Confirming the number of detected faces Keeping the button pressed will display the number of faces detected by the camera 35 at the most orange main subject's face, white detected face. If you press the shutter button halfway after roughly focusing manually, you can fine tune the focus. The focus adjustment can be set in 3 levels. In flash settings other than ! p. Evaluative Center Weighted Avg. Spot Choose the Metering mode. AE stands for "Auto Exposure". At the same time, you can use a slow shutter speed to brighten the background that the light from the flash cannot reach. The camera will set the appropriate aperture value for the shutter speed you set. M stands for "Time value". The camera will set the appropriate shutter speed for the aperture value you set. B stands for "Aperture value". D stands for "Manual". By performing operations with the control ring, you can enjoy the feeling of using a fully manual camera. The functions assigned to the control dial also change. It can then keep highlights from blowing out in light areas only p. 76, and automatically adjust dark areas to the optimum brightness. Redeye correction may be applied to red areas other than red eyes. However, the shooting conditions may cause the image to become coarse, or the colors may not come out as expected. T Color Accent You can choose to retain a single color and change the rest to black and white in a composition.

The unchanged image and the Color Swap image will both display. E Standard Normal mode. However, unnatural sound may result when used to record in locations with no wind. The movie editing panel and the movie editing bar will appear. The latter part explains how to specify images for printing. Searching Images Using the Control Dial Turn the control dial to quickly search images. You can also jump by the shooting date Scroll Display. Viewing Images in Filtered Playback When there are many images on the memory card, you can filter and display them by a specified filter. You can also protect p. 127 or delete p. 130 all images at once while filtered. Viewing images using filtered playback. When you choose in Step 1 on p. 119, if there are only images with the same

date, you can only choose one filter. Also, you can only choose images sorted into categories in Filtered playback In filtered playback Step 2, you can view filtered images with “Quickly Searching Images”. Press the **1** button, and switch to the focus check display p. 44. A white frame will appear where the AF frame or face was when the focus was set. If you keep the **qr** buttons pressed, you can fast forward through images. Operation sounds will not play when connected to a highdefinition TV. Turn off the camera and TV. Connect the camera to the TV. Protected images cannot be erased with the camera’s erase function. To erase an image, cancel protection first. Choose the starting image. Since erased images cannot be recovered, exercise adequate caution before erasing. Protected images p. 127 cannot be erased. Also, when the overall image is lacking in contrast, the camera will automatically correct the image for a sharper impression. Easily Add Images to the Print List Print Added Images The following examples use the Canon SELPHY series printers. Please also refer to the Personal Printing Guide. Number of copies to print Choose an image.

These selection methods comply with the DPOF Digital Print Order Format standards. The first part of this chapter explains convenient and commonly used functions. The latter part explains how to change shooting and playback settings to suit your purposes. You can turn off this function. Changing the Lens Retract Time For safety reasons, the lens retracts about 1 minute after pressing the **1** button when in a Shooting mode p. Using the World Clock When traveling abroad, you can record images with local dates and times simply by switching the time zone setting if you preregister the destination time zones. Set the world time zone. You can turn off this function. Changing the Image Display Time You can change the length of time the images display directly after shooting. Changing the Way the Image Displays Right After Shooting You can change the way the image displays after shooting. If you press the shutter button halfway and return to the shooting screen from the custom display settings screen, the settings will not be saved. Gray items can also be set, however, they may not display depending on the Shooting mode. Image stabilization does not work when the camera is held vertically. Any previously registered startup image will be overwritten when registering a new startup image. Using the included software to register sounds and the startup screen image You can register sounds and startup screen images that come with the included. The index also appears at the end. Do not unplug the plug and power cord with the camera turned on. This could erase images you have taken or damage the camera. If the items below do not solve your problem, contact a Canon Customer Support Help Desk as listed on the included customer support list. Power You pressed the power button, but nothing happened. Press the power button to turn the camera off and back on p. 42.

If this error message continues to appear, contact your Canon Customer Support Help Desk as there may be a problem with the lens. Sound Options Set the sounds for each camera operation. Format Formats memory card, erasing all data File Numbering. Erase Erases images. Protect Protects images. Rotate Rotates images. My Category Categorizes images. Corrects dark portions and contrast in still iContrast images. RedEye Correction Corrects red eyes in still images. Trimming Trims portions of still images. This page requires Javascript. Its a rotating, programmableIm covering just whats important for making pictures, not every possible crazy setting. Other countries may get the corded CB2LYE, which is far less convenient. Our shottoshot settings are made with control knobs below, not in menus. If Ive forgotten if I use a setting at its default, I list it here again just to be sure not to forget it. This programs ALL my settings to recall themselves when I select the C position on the top dial. This skips the stupid Canon ad every time I turn on the S90. We set the big front ring to control exposure above. To get this In FINE, images look the same as NORMAL, but use twice the file size. Unless youre using DxO or Canons software, other software like Adobe Camera Raw will give you highly distorted images from RAW files made at the wide end of the zoom. Brilliant! Hold it again to revert to normal brightness. Its great people like you who allow me to keep adding to this site fulltime. Thanks. It costs you nothing and is a huge help. These places have the best prices and service, which is why Ive used them since before this website existed. I recommend them all personally. I find it much easier to let you read this first and pay on your own, than trying to ask for payment first. Using the online preview, you can quickly view the contents and go to the page where you will find the solution to your problem with Canon S90. To start viewing the user manual Canon S90 on full screen, use the button Fullscreen. However, if you do not want to take up too much of your disk space, you can always download it in the future from ManualsBase.

The option to print the manual has also been provided, and you can use it by clicking the link above Print the manual. You do not have to print the entire manual Canon S90 but the selected pages only. paper. If you want to quickly view the content of pages found on the following pages of the manual, you can use them. Should the product cease to function in its intended manner, it should be returned

to the manufacturer or be discarded. This power unit is intended to be correctly orientated in a vertical or floor mount position. For connection to anything is missing, contact the retailer from which you purchased the camera. Please note that Canon Inc., its subsidiaries and affiliates, and its distributors are not liable for any consequential damages arising from any malfunction of a camera or accessory, including memory cards, that results in the failure of an image to be recorded or to be recorded in a way that is machine readable. Lets try to capture them. Rules

Life span 3 year 2 month. It. When shooting underwater. Better deal than available online. PM me for details. Local pickup. I feel like a 3 year old on Christmas Eve. The lens comes with a control ring around it allowing control over some exposure settings. In many ways this is a Canon PowerShot G11 in a smaller body and without the longer focal range of the G11. The PowerShot S90 continues the PowerShot Sseries tradition with impressive, fully manual features that deliver excellent image quality and user experience, including It enables users to frame and review images easily thanks to an exceptionally wide viewing angle, 461k dot resolution and great colour rendition. The Control Ring can be used as a quasimanual zoom offering a closer view of subjects in 28mm, 35mm, 50mm,

85mm and 105mm steps. The Control Ring also helps enhance user interaction with the camera by offering fast, accurate scrolling through menus, functions and images. In new Nostalgic Mode the Control Ring can also be used to add an aged effect to the shot, from a subtle faded look to full grainy black and white. A new Low Light mode can help users capture reduced resolution 2.5 Megapixel images in very dim light at ISO speeds of up to ISO 12800 and at a fast 2.4 frames per second. Users will also find it easy to share images captured on the camera with family and friends, thanks to an HDMI mini port, which enables the camera to be connected to a compatible TV using an optional cable. We wont share it with anyone We wont share it with anyone We wont share it with anyone.

You may find documents other than just We keep our list of direct Canon PowerShot S90 driver and firmware links uptodate so they are easy to find when you need them. Suffice to say I havent come across any and am still searching. A quick search on youtube shows at least the following There are some more videos in the related section. The prices seem OK for other cameras. Have you considered this option I assume this isnt the actual lens optics but similar protection to a UV filter or lens protector filter for a DSLR lens. Does anyone know If I could only safely remove it. Read our full review to see why its got the best autofocus system weve ever seen. 717 Olympus OMD EM10 Mark IV initial review first impressions Aug 4, 2020 at 0600 The Olympus OMD EM10 IV is the companys entrylevel DSLRshaped mirrorless camera. While it has a higher resolution sensor and new processor, its biggest focus is on selfies. 2258 Sony a7S III initial review Jul 28, 2020 at 1400 The Sony a7S III is a 12MP fullframe camera primarily designed with video in mind. We take a look beyond the specs to see what it offers to filmmakers. 1608 Olympus OMD EM1 Mark III review review Jul 27, 2020 at 1450 The Olympus OMD EM1 Mark III is our favorite Micro Four Thirds camera for stills shooters to date. In this roundup we take a look at four travel tripods and pick our favorite. In our latest buying guide weve selected some cameras that might be a bit older but still offer a lot of bang for the buck. These midrange cameras should have capable autofocus systems, lots of direct controls and the latest sensors offering great image quality. Best cameras for sports and action Aug 11, 2020 at 0146 Whats the best camera for shooting sports and action. Fast continuous shooting, reliable autofocus and great battery life are just three of the most important factors. In this buying guide weve roundedup several great cameras for shooting sports and action, and recommended the best.

Best enthusiast long zoom cameras Jul 16, 2020 at 2329 Longzoom compacts fill the gap between pocketable cameras and interchangeable lens models with expensive lenses, offering a great combination of lens reach and portability. Read on to learn about our favorite enthusiast long zoom cameras. High ISO 3200 capability makes it possible to capture critical shots even under poor lighting conditions. Advanced Face Detection, Optical Image Stabilization, and a slew of custom scene modes keep all of your subjects looking their best. The newly developed customizable zoom ring allows manual shooters to take control of focus, exposure, ISO, zoom, or white balance settings. With its classic design and powerful feature set, the Canon PowerShot S90 Digital Camera is the perfect choice for photo enthusiasts everywhere. The coupling of a 10 megapixel CCD sensor and Canons latest DIGIC 4 Image Processor dramatically increases light sensitivity while reducing noise. With its classic design and powerful feature set, the Canon PowerShot S90 Digital Camera is the perfect choice for photo enthusiasts everywhere. Impressive ISO 3200 capability reduces blur and subject movement for crisp photos with spectacular sharpness and clarity. Compact and Pocketfriendly The S90 boasts an incredibly slim profile and lightweight body for true pocket-sized convenience. For the photographer that never wants to miss an opportunity, the S90 is the high quality camera that you can carry every day. 3.8x Optical Zoom Lens With an equivalent zoom range of 28105mm, Canons 3.8x Optical Zoom Lens captures everything from sweeping landscapes to telephoto action shots with ease. Advanced multicoatings prevent visual interference from dust, scratches, and reflections. Custom Exposure Control The new control ring around the lens of the S90

offers precise adjustment to focus, exposure, ISO, zoom, or white balance settings. Intuitive and easy to use, the ring is fully customizable to meet your shooting preferences.

RAW File Capture RAW files allow you to capture images without the loss of detail associated with JPEG compression. Using the included Canon software or a compatible 3rd party RAW converter, you'll enjoy complete creative control in postproduction with precise manipulation of shadows, highlights, color, and other image elements. Let us know YOUR RECENTLY VIEWED ITEMS Browsing History ON Clear History 0 36 Not responsible for typographical or illustrative errors.
